(New Addition, Remodel, Other)

Additional Fee Total \$ _____

Advanced Structural Components

Indiana Code 22-11-21-9 requires that any structures using advanced structural components for floors and roofs, must be identified on this application.

Pursuant to Indiana Code 22-11-21-2, “advanced structural components” means lightweight I-joists or lightweight roof trusses that: (1) have less mass cross-sectional area than sawn lumber of equivalent proportions used in an equivalent application; and (2) are assembled from combustible or noncombustible materials, or both.

The term does not include a structural assembly, joist, or truss that provides at least one (1) hour of fire resistance when tested in accordance with the ASTM Standard E119.

- This property does not contain any advanced structural components
- This property contains advanced structural components.

List types and locations of any advanced structural components used in the floor, or roof, or both:

Floodplain Management

- This property is not located within a floodplain.
- This property is located within a floodplain.

FOR OFFICE USE ONLY

I have reviewed the location of this property and verified that:

- This property is not located within a floodplain.
- This property is located within a floodplain.
